"STEALING FIRE FROM THE VACUUM"

AETHERION MARK 2-V

Vacuum Energy Extraction System

ZS CORP. LAB P5

SUBTERRANEAN RESEARCH DIVISION

THE FALL OF OLYMPUS

LAB 7Z INCIDENT // CLASSIFIED

INCIDENT REPORT: ZS-7Z-BREACH-XXXX

[PARTIALLY DECLASSIFIED]

LAB 7Z — the birthplace of the **Aetherion Mark 1** propulsion prototype and the entire **ATTI (Aetherion Technology Transfer Initiative)** corpus — suffered a catastrophic security breach.

An internal actor exfiltrated classified documentation including RTM theory, device schematics, and experimental data. The leak was traced to [redacted].

LAB 7Z was immediately **DECOMMISSIONED**. The project was **DECAPITATED**.

ἐκ τῆς τέφρας ἀναγεννηθείς

"From the ashes, reborn"

But fire cannot be unlearned. From the recovered data fragments, **LAB P5** rises. 200 meters below ground. Off every map. The work continues.

THE NEW PROMETHEUS

ZS CORP. LAB P5 // SUBTERRANEAN

FACILITY SPECIFICATIONS

Designation: LAB P5 (PROMETHEUS)
Depth: 200m below surface
Location: [COORDINATES EXPUNGED]
Access: Single-point entry / Biometric
Parent Org: ZARPAFANTASMA SYSTEMS
Status: **ACTIVE**

PRIMARY MISSION

Continue vacuum energy research using recovered LAB 7Z data.

Develop **AETHERION MARK 2-V**
Code Name: **"PROMETEO"**

Objective: Prove vacuum energy can be **EXTRACTED**, not just pushed.

*"The Aetherion Mark 2-V **"PROMETEO"** is a dedicated vacuum energy extraction system derived from the Mark 1 propulsion prototype **DATA RECOVERED** from the decommissioned **LAB 7Z**."*

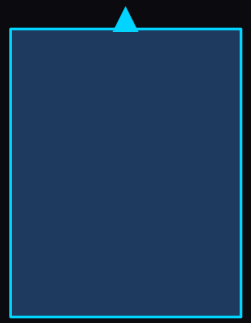
— Project Charter, ZS-P5-PROMETEO-001

EVOLUTION OF FIRE

FROM THRUST TO EXTRACTION

MARK 1 "PATHFINDER"

[LAB 7Z — DECOMMISSIONED]



Output: 100-500 nN thrust
Geometry: Cylindrical

MARK 2-V "PROMETEO"

[LAB P5 — ACTIVE]

Output: 10 mW - 1 W electrical
Geometry: Toroidal

THE PROMETHEUS METAPHOR

Prometheus stole fire from the gods. **PROMETEO** steals energy from the vacuum — the most fundamental fire in physics.

PROMETEO SPECIFICATIONS

TOROIDAL VACUUM ENERGY EXTRACTOR

PARAMETER	MARK 1	PROMETEO
Geometry	Cylinder	Torus
Dimensions	Ø60×85 mm	R_maj=80, R_min=40 mm
Core Volume	100 cm³	500 cm³
Layers	23	31
Alpha Range (Δα)	1.5	2.2 (+47%)
Primary Output	Thrust	**Electrical Power**
Expected Output	100-500 nN	**0.5-2.0 W**
Ghost Clan Access	FORBIDDEN	OPTIONAL (w/safety)

FUNDAMENTAL

$$P = \gamma \times \nabla\alpha \cdot \nabla\varphi$$

Power Transfer Eq.

$$P \propto (\Delta\alpha)^4$$

ENERGY HARVESTING

Thermal: 60%
RF Capture: 25%
Piezoelectric: 15%

31-LAYER METAMATERIAL CORE:

W-Re → Nb-Ti → Cu-Ni → Fe-Co → Mn-Cr → V-Sc

α: 0.3 → 2.5

THE FORBIDDEN BAND

μὴ πλησιάζετε τῷ πυρὶ τῶν θεῶν
"Do not approach the fire of the gods"

The **6th Topological Band** ($\alpha \approx 3.0+$), designated **"GHOST CLAN"**, is a quantum-generated vacuum state not present classically. It represents an unstable high-energy reservoir.

Entry into this band risks **TOPOLOGICAL COLLAPSE** — catastrophic release of stored vacuum energy.

MODE	α_max	AUTHORIZATION	RISK
SAFE	2.5	Standard	LOW
ELEVATED	2.7	Supervisor	MODERATE
PROXIMITY	2.9	Red Team	HIGH
GHOST	3.0+	**DO NOT OPERATE**	**CRITICAL**

EMERGENCY: IF α > 3.0

1) EVACUATE 50m 2) DO NOT APPROACH **3) NOTIFY EMERGENCY RESPONSE**

MAX RELEASE: ~100 kJ

THE PATH FORWARD

PROMETEO DEVELOPMENT ROADMAP

2027	2028	2029	2030
DESIGN	FABRICATION	TESTING	OPTIMIZATION

KEY MILESTONES

Design Freeze	APR 2027	All specs finalized
Core Fabrication	AUG 2027	Dimensional verification
First α-Gradient	NOV 2027	Any measurable gradient
First Heat Excess	DEC 2027	Vacuum coupling confirmed
100-Hour Endurance	MAR 2027	System stability proven
Mark 3 Decision	JUN 2027	Based on PROMETEO results

THE PROMETEO MISSION

Mark 1 proved we can **PUSH** against the vacuum.

Mark 2-V will prove we can **PULL** energy from it.

Mark 3 will prove we can do both... **profitably.**

We are not building a power plant.

We are building a proof of principle.

We are stealing fire from the vacuum.

One watt at a time.

ZS CORP. LAB P5 // PROMETEO PROJECT
