

ΠΡΟΜΗΘΕΥΣ PROMETEO

"STEALING FIRE FROM THE VACUUM"

AETHERION MARK 2-V

Vacuum Energy Extraction System

ZS CORP. LAB P5

SUBTERRANEAN RESEARCH DIVISION

THE FALL OF OLYMPUS

LAB 7Z INCIDENT // CLASSIFIED

INCIDENT REPORT: ZS-7Z-BREACH-XXXX

[PARTIALLY DECLASSIFIED]

LAB 7Z — the birthplace of the **Aetherion Mark 1** propulsion prototype and the entire **ATTI (Aetherion Technology Transfer Initiative)** corpus — suffered a catastrophic security breach.

An internal actor exfiltrated classified documentation including RTM theory, device schematics, and experimental data. The leak was traced to [REDACTED].

LAB 7Z was immediately **DECOMMISSIONED**. The project was **DECAPITATED**.

ἐκ τῆς τέφρας ἀναγεννηθεῖς

"From the ashes, reborn"

But fire cannot be unlearned. From the recovered data fragments, **LAB P5** rises.
200 meters below ground. Off every map. The work continues.

THE NEW PROMETHEUS

ZS CORP. LAB P5 // SUBTERRANEAN

FACILITY SPECIFICATIONS

Designation: LAB P5 (PROMETHEUS)
Depth: 200m below surface
Location: [COORDINATES EXPUNGED]
Access: Single-point entry / Biometric
Parent Org: ZARPAFANTASMA SYSTEMS
Status: **ACTIVE**

PRIMARY MISSION

Continue vacuum energy research
using recovered LAB 7Z data.

Develop **AETHERION MARK 2-V**
Code Name: "**PROMETEO**"

Objective: Prove vacuum energy
can be **EXTRACTED**, not just pushed.

*"The Aetherion Mark 2-V "**PROMETEO**" is a dedicated vacuum energy extraction system derived from the Mark 1 propulsion prototype **DATA RECOVERED** from the decommissioned **LAB 7Z**."*

— Project Charter, ZS-P5-PROMETEO-001

EVOLUTION OF FIRE

FROM THRUST TO EXTRACTION

MARK 1 "PATHFINDER"

[LAB 7Z - DECOMMISSIONED]

CYLINDER

Output: 100-500 nN thrust

Geometry: Cylindrical

MARK 2-V "PROMETEO"

[LAB P5 - ACTIVE]

POWER

TORUS

Output: 10 mW - 1 W electrical

Geometry: Toroidal

THE PROMETHEUS METAPHOR

Prometheus stole fire from the gods. **PROMETEO** steals energy from the vacuum — the most fundamental fire in physics.

PROMETEO

SPECIFICATIONS

TOROIDAL VACUUM ENERGY EXTRACTOR

PARAMETER	MARK 1	PROMETEO
Geometry	Cylinder	Torus
Dimensions	Ø60×85 mm	R_maj=80, R_min=40 mm
Core Volume	100 cm³	500 cm³
Layers	23	31
Alpha Range (Δα)	1.5	2.2 (+47%)
Primary Output	Thrust	Electrical Power
Expected Output	100-500 nN	0.5-2.0 W
Ghost Clan Access	FORBIDDEN	OPTIONAL (w/safety)

FUNDAMENTAL

$$P = \gamma \times \nabla \alpha \cdot \nabla \phi$$

Power Transfer Eq.

$$P \propto (\Delta \alpha)^4$$

ENERGY HARVESTING

Thermal: 60%
RF Capture: 25%
Piezoelectric: 15%

31-LAYER METAMATERIAL CORE:

W-Re → Nb-Ti → Cu-Ni → Fe-Co → Mn-Cr → V-Sc

α: 0.3 → 2.5

THE FORBIDDEN BAND

μη πλησιάζετε τῷ πυρὶ τῶν θεῶν
"Do not approach the fire of the gods"

The **6th Topological Band** ($\alpha \approx 3.0+$), designated "**GHOST CLAN**", is a quantum-generated vacuum state not present classically. It represents an unstable high-energy reservoir.

Entry into this band risks **TOPOLOGICAL COLLAPSE** — catastrophic release of stored vacuum energy.

MODE	α_{max}	AUTHORIZATION	RISK
SAFE	2.5	Standard	LOW
ELEVATED	2.7	Supervisor	MODERATE
PROXIMITY	2.9	Red Team	HIGH
GHOST	3.0+	DO NOT OPERATE	CRITICAL

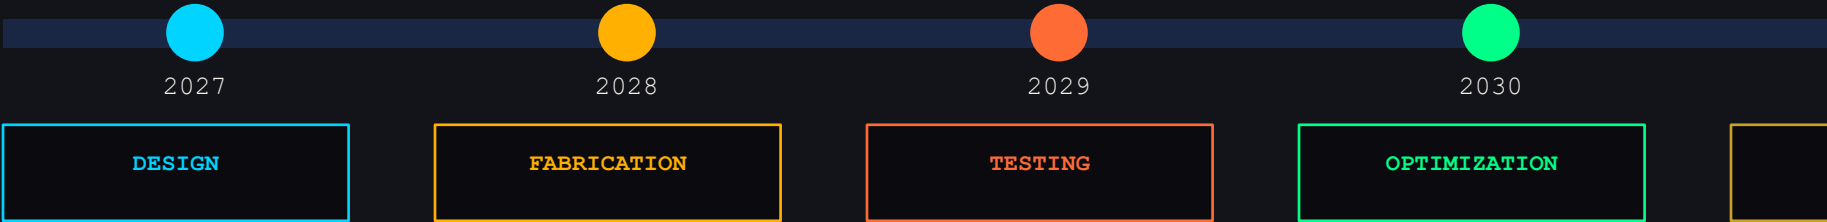

EMERGENCY: IF $\alpha > 3.0$

1) EVACUATE 50m 2) DO NOT APPROACH 3) NOTIFY EMERGENCY RESPONSE

MAX RELEASE: ~100 kJ

THE PATH FORWARD

PROMETEO DEVELOPMENT ROADMAP

KEY MILESTONES

Design Freeze	APR 2027	All specs finalized
Core Fabrication	AUG 2027	Dimensional verification
First α -Gradient	NOV 2027	Any measurable gradient
First Heat Excess	DEC 2027	Vacuum coupling confirmed
100-Hour Endurance	MAR 2027	System stability proven
Mark 3 Decision	JUN 2027	Based on PROMETEO results

THE PROMETEO MISSION

Mark 1 proved we can **PUSH** against the vacuum.

Mark 2-V will prove we can **PULL** energy from it.

Mark 3 will prove we can do both... **profitably.**

We are not building a power plant.

We are building a proof of principle.

We are stealing fire from the vacuum.

One watt at a time.

ZS CORP. LAB P5 // PROMETEO PROJECT
